

KTL, The National Public Health Institute

is nominating

Department of Virology, Haartman Institute, University of Helsinki / Helsinki
University Hospital Laboratory Diagnostics; Prof. Antti Vaheri and Prof. Olli
Vapalahti

as the national participant of the ENIVD project with regard to the following
infectious agents:

**Hemorrhagic Fever Viruses, Arboviruses, Orthopoxviruses and other potential
viral bioweapons.**

This participation will include proper support to the Community Network for the
epidemiological surveillance and control of communicable diseases in compliance with the
requirements as defined in Decision no. 2119/98/EC. The information flow will be guaranteed
via the structures and/or public health authorities designated according to Article 9 of that
Decision.

May 8, 2003

Pauli Leinikki
Director, Department of Infectious Disease Epidemiology
National Public Health Institute
